Experience

AD Infocom System *Jul 2025 – Aug 2025*
Web Developer Intern

- Developed responsive web interfaces using **React.js, Next.js, and Tailwind CSS**, ensuring cross-device compatibility.
- Integrated frontend with **REST APIs**, handling JWT authentication and asynchronous data state management.
- Optimized backend performance using **Node.js and MongoDB**, reducing query response times through efficient CRUD operations.

Projects

- **Alma Port**
  - Designed and developed a Blockchain-Based Alumni Verification Portal using React, Node.js, and Solidity to enable secure and tamper-proof academic credential verification.
  - Implemented keccak256 hashing and smart contracts on the Polygon Mumbai testnet to store immutable certificate records with issuer validation and timestamping.
  - Built an end-to-end verification workflow with QR code generation and instant certificate validation through blockchain queries, reducing manual verification time from days to seconds.
- **SureScore**
  - Built a full-stack quiz platform with group access and confidence-based scoring.
  - Built user and admin dashboards with focus on usability and performance optimization.
  - Implemented JWT-based authentication and role-based authorization.
  - **Tech Stack:** MongoDB, Express.js, React.js, Node.js
- **Sales Forecast Regression Model**
  - Designed a sales forecasting solution using regression models (XGBoost, LightGBM).
  - Performed feature engineering and exploratory data analysis to identify demand patterns.
  - Tuned models using cross-validation to improve prediction accuracy and reduce error.
